EDUCATION

Columbia University, School of Professional Studies, New York, NY
Master of Science, Applied Analytics (Quantitative)

December 2027

Fisk University, Nashville, TN

May 2026

Bachelor of Science, Bioinformatics, Business Administration (minor)

GPA – 4.0 ([Valedictorian](#))

Relevant Courses: Machine Learning, Data Engineering, Data Structures & Algorithms, Statistics, Calculus, Finance

TECHNICAL SKILLS & CERTIFICATIONS

Tech Stack: Languages (Python, SQL, R, Java), Machine Learning (Scikit-learn, PyTorch, TensorFlow), Data Analytics & Engineering (Pandas, NumPy, PostgreSQL), Visualization (Power BI, Matplotlib, Seaborn)

Developer Tools: Git, GitHub, Visual Studio Code, Bash/Zsh (CLI), Jupyter Notebook, Replit, Microsoft Suite

Certifications: Google Advanced Data Analytics, Akuna Capital Options Trading 101, Bloomberg Market Concept

INDEPENDENT TECHNICAL PROJECTS

[Clinical Sepsis Early Warning System](#), Python, SQL, Scikit-learn, PyTorch, Streamlit

July 2026

- Built end-to-end sepsis prediction pipeline on 40,000+ ICU patient records, engineering temporal features and achieving 89% recall for predicting sepsis 4–6 hours before onset
- Deployed Streamlit dashboard with real-time sepsis risk scoring, SHAP explanations, and model comparison

[Customer Churn Prediction System](#), Python, SQL, PostgreSQL, Scikit-learn, Streamlit | [Live App Link](#)

June 2026

- Built end-to-end customer churn prediction ML pipeline using PostgreSQL, SQL, and Scikit-learn, training Logistic Regression and Random Forest models that achieved 81% accuracy on 7000+ telecom customer records
- Deployed interactive Streamlit dashboard with executive KPIs, Plotly visualizations, real-time churn predictions

[Sensor-Based Exercise Classifier and Rep Counter](#), Python, Scikit-learn, Pandas, NumPy

March 2026

- Built ML pipeline from accelerometer and gyroscope time-series data with 97.46% accuracy via Random Forest
- Engineered sliding-window and peak-detection algorithms to automate exercise recognition and rep counting

[LSTM Real-Time Stock Price Predictor](#), Python, TensorFlow, yFinance, Scikit-learn, Matplotlib

August 2025

- Developed Stacked and Bidirectional LSTM models to forecast real-time market trends using historical data
- Implemented a live prediction dashboard to simulate real-world trading at a 92% directional model accuracy

PROFESSIONAL EXPERIENCE

Stak, Co-Founder, Strategy & Investor Relations

January 2026 – Present

- Architected product strategy by analyzing feedback from 125+ investor cohorts, identifying 3 core investing barriers and translating insights into a personalized, simulation-first product roadmap
- Defined MVP requirements for AI-powered equity research and risk-free portfolio simulation, contributing to 100+ users, 100+ monthly active users, 700+ website visits, and 1100+ platform interactions

Nashville Mayor's Office, Economic and Community Development Intern

January 2026 – April 2026

- Analyzed 10,000+ public economic and workforce records using econometric methods to inform city-wide policy
- Led 6 technical projects in workforce development, small business support, and equitable community investment

Merck and Co., Research & Development Intern

May 2025 – August 2025

- Quantified 45 physicochemical properties across 6 excipient-degrading proteins using downstream data analytics
- Applied 25+ molecular docking computational simulations to study interactions of target proteins and excipients

LEADERSHIP & COMMUNITY INVOLVEMENT

Columbia University School of Professional Studies, HBCU Cohort 10 Fellow

April 2026 – Present

- Selected for a competitive leadership and professional development fellowship for high-achieving HBCU students

American Association for the Advancement of Science, Distinguished Member

September 2025 – Present

- Recognized through distinguished membership in the world's largest multidisciplinary scientific society
